Hello, my name is

LUIS ALBERTO TAPIA GONZALEZ

ABOUT ME:

Hello! Currently I'm an Econ and Finance dual major, in a couple years I'll be seeking a career in Finance or Supply Chain Management. Some pathways that interest me are being a financial manager or logistics project manager, firm doesn't really matter to me as long as I can be around those I love.

When it comes to technology I'd say I am well informed, I understand basic computer functions. In my line of work as a tech repair specialist I work a lot with laptops, tablets, desktop computers... some skills of mine are being able to remove virus, install system OS, as well as repair hardware components. Software is where I struggle, I have a novice understanding of excel, quickbooks, powerpoint, etc, of which I've only used in a school setting.

A little bit about myself, I was born in Mexico and came to the US when at age 3. My reason behind choosing UNR was being close to home, I love the culture on campus and the amazing faculty who value student success. As a kid I would envision myself as a student, now I'm glad to have made that little kid's vision in to reality. Outside of school I train jiu-jitsu, currently a blue belt, previously I wrestled for 5 years and when I can I help coach at my old high school. I'm a big foody, my favorite food is chicken fried steak and when I'm not eating I either spend time with family or watching Pixar films. Someday I hope to have a big family and own a 1 acre property in Texas where I can barbecue and look up to the stars.

My Neice
